

## Forced Landings

As pilots, we practice forced landing procedures in certain emergency situations; mastering a skill set that we hope we never need to utilize. This seminar will explore forced landing scenarios and discuss things to consider should we ever need to execute an actual forced landing, rather than just practicing for the possibility of one. Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines.

**Directions:** This meeting will be held on the second floor of the administration building
